

## Prior Learning

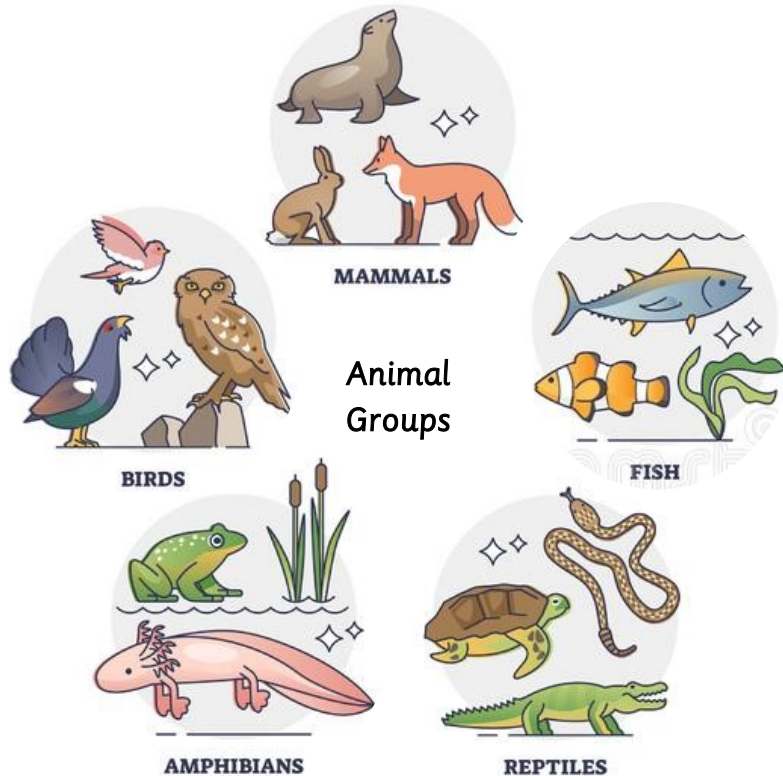

- I can explore the natural world around me, making observations and drawing pictures of animals and plants.
- I know about some important processes and changes in the world around them, including the seasonal change and animal life cycles (chicks/birds, frogs, caterpillars, humans).

## Sticky Knowledge

- I can identify and name some common animals including fish, amphibians, reptiles, birds and mammals.
- I can say some common animals that are carnivores, herbivores and omnivores.
- I can say what parts of my body are used for each sense.
- I can identify, name, draw and label the basic parts of the human body.

## Vocabulary

<b>Animals</b>	Living things that can move and think for themselves.
<b>Amphibians</b>	They live in water as babies and on land as they grow bigger. They have smooth, smiley skin.
<b>Birds</b>	All birds have a beak, two legs, feathers and wings. They lay eggs.
<b>Fish</b>	Fish live and breathe under water. They have scales, fins to help swim and breathe through their gills.
<b>Mammals</b>	Mammals are animals that grow hair or fur. Mothers give birth to live young and feed them with their milk.
<b>Reptiles</b>	All reptiles breathe air. They have scales on their skin and lay eggs.
<b>Carnivore</b>	An animal that only eats meat.
<b>Herbivore</b>	An animal that only eats plants.
<b>Omnivore</b>	An animal that eats both meat and plants.
<b>Our Senses</b>	These help us to find out about what is around us.
<b>Hearing</b>	Your ears listen to sounds and your brain works out what the different sounds are.
<b>Sight</b>	Your eyes help you to see around you.
<b>Smell</b>	You can smell with your nose. Your nose can detect if things smell nice or not.
<b>Taste</b>	Your taste buds on your tongue can tell if things are sweet, sour, bitter or salty.
<b>Touch</b>	Your skin gives your sense of touch. You can tell how something feels without even looking at it.
